No. MJP / MS / T.S.I / 2435

June 7, 2000

## Technical Circular No. 43

Maharashtra Jeevan Pradhikaran has undertaken a number of Water Supply Schemes for individual villages and Regional Schemes.

Some of the schemes are at commissioning stage by 30.6.2000 and some can be commissioned later, by December 2000 and March, 2001

While commissioning the schemes all the appurtenances which are necessary to be provided [e.g. Air Valves and Water Hammer Control Devices, Sluice Valves, Cages etc.] should be installed without which the mains can't be and should not be treated as commissioned for smooth functioning in future.

These items may be procured as per procedure and norms of MJP, as a part of the commissioning of water supply schemes.
